

Swiggy Sales & Restaurant Performance Dashboard

Excel Business & Data Analytics Project

Prepared By : **ASHMIT GUPTA**

Excel

Tools & Techniques Used

- Microsoft Excel
- Pivot Tables
- Pivot Charts
- KPI Cards
- Slicers & Filters
- Data Cleaning
- Dashboard Design
- Business Analysis

PROJECT OVERVIEW

This project analyzes Swiggy food delivery data using Microsoft Excel to identify sales trends, customer behavior, restaurant performance, and revenue insights through interactive dashboards and visual storytelling.

Dashboard Focus Areas :

- Customer Ordering Behavior
- Food Category Performance
- Restaurant Analysis
- Revenue Trends
- Ratings Analysis

Dataset Information :

- 197K+ Orders Analyzed
- ₹53M+ Total Sales
- 4.34 Average Rating
- Multiple Cities & Categories

BUSINESS PROBLEM STATEMENT

The food delivery industry relies heavily on data-driven decision making to improve customer satisfaction and business performance.

This project aims to answer key business questions such as:

- Which cities generate the highest sales?
- Which food categories perform best?
- How do sales fluctuate over time?
- Which restaurants maintain higher ratings?
- What business areas need improvement?

The analysis helps identify customer preferences, sales patterns, and growth opportunities.

DATASET OVERVIEW

The dataset contains Swiggy restaurant and food order information collected across multiple cities and categories.

Main Columns :

- State & City
- Restaurant Name
- Food Category
- Dish Name
- Food Type
- Price
- Rating
- Order Date

Dataset Highlights :

- 197K+ Orders Analyzed
- ₹53M+ Sales Data
- Multiple Food Categories
- Customer Ratings Included

Analysis Performed :

- Revenue Analysis
- Category Performance
- Restaurant Comparison
- Trend Analysis
- KPI Reporting

This dataset was used to build an interactive Excel dashboard for business analysis and data storytelling.

DATA CLEANING & PREPARATION

The raw dataset was cleaned and formatted before analysis to ensure accurate reporting and dashboard performance.

Cleaning Steps Performed

- Removed duplicate records
- Checked missing values
- Corrected text formatting
- Standardized category names
- Formatted date columns

Excel Features Used

- IF Functions
- SUMIFS & COUNTIFS
- Sorting & Filtering
- Conditional Formatting

Purpose

- Data cleaning improved:
- Accuracy
- Consistency
- Reliability of insights
- Dashboard efficiency

This dataset was used to build an interactive Excel dashboard for business analysis and data storytelling.

Key Performance Indicators (KPIs)

The dashboard includes important business KPIs to monitor sales performance, customer engagement, and operational efficiency.

KPI Highlights :

- ₹53M+ Total Sales Generated
- 197K+ Orders Processed
- 4.34 Average Customer Rating
- ₹268 Average Order Value
- 6M+ Customer Ratings Recorded

These KPIs provide a quick overview of overall business performance and customer behavior.

Sales Trend & Regional Performance Analysis

MOTHLY TREND	
Row Labels	Sum of Price
Jan	₹ 6.8 M
Feb	₹ 6.3 M
Mar	₹ 6.6 M
Apr	₹ 6.6 M
May	₹ 6.8 M
Jun	₹ 6.5 M
Jul	₹ 6.7 M
Aug	₹ 6.8 M
Grand Total	₹ 53.0 M

DAILY SALES TREND	
Row Labels	Sum of Price
Mon	₹ 7.45 M
Tue	₹ 7.36 M
Wed	₹ 7.54 M
Thu	₹ 7.66 M
Fri	₹ 7.58 M
Sat	₹ 7.78 M
Sun	₹ 7.64 M
Grand Total	₹ 53.01 M

Monthly Sales Trend

Daily Sales Trend

Sales By States

Key Insight : Sales trends remained stable across different periods, while a few states contributed significantly higher revenue than others.

Customer & Regional Performance Analysis

FOOD TYPE	
Row Labels	Sum of Price (INR)
Non-veg	₹ 18.3 M
Veg	₹ 34.7 M
Grand Total	₹ 53.0 M

Total Sales, Rating & Total Orders By States

QUARTE SALES		RATINGS ORDERS	
Q1	₹ 19.7 M	4.3	73.1K
Q2	₹ 19.9 M	4.3	74.2K
Q3	₹ 13.4 M	4.3	50.2K

Key Insights : Veg food categories and top-performing cities contributed significantly to overall sales revenue and customer demand.

- Weekly and quarterly sales trends showed consistent business performance with noticeable seasonal fluctuations across different periods.

Interactive Dashboard

Key Insights :

- e.
-
- Diagram illustrating a book with various data points and letters associated with it, likely representing a dataset or a collection of information.
- Left side (Book pages):

 - 4%
 - 6%

BUSINESS RECOMMENDATIONS

Based on the analysis, the following recommendations can improve operational and business performance.

- **Improve Low-Performing Categories :**
Introduce promotional campaigns for categories generating lower sales.
- **Focus on High-Rated Restaurants :**
Prioritize partnerships and visibility for top-performing restaurants.
- **Enhance Customer Experience :**
Maintain consistent food quality and delivery service to improve ratings further.
- **Seasonal Marketing Campaigns :**
Launch targeted campaigns during high-demand periods to maximize revenue.
- **Expand Successful Categories :**
Invest more in food categories with consistently high customer demand.

TOOLS & SKILLS USED

The dataset contains Swiggy restaurant and food order information collected across multiple cities and categories.

Technical Skills :

- Microsoft Excel
- Pivot Tables
- Pivot Charts
- Dashboard Design
- KPI Reporting
- Data Cleaning
- Data Visualization
- Slicers & Interactive Filters

Analytical Skills :

- Business Analysis
- Trend Identification
- Data Storytelling
- Insight Generation
- Performance Analysis

Soft Skills Demonstrated :

- Problem Solving
- Analytical Thinking
- Business Understanding
- Reporting & Presentation

CONCLUSION

This project demonstrates the ability to transform raw business data into meaningful insights using Microsoft Excel.

Through dashboarding, KPI reporting, pivot table analysis, and storytelling techniques, the project successfully highlights:

- Sales performance trends
- Customer behavior patterns
- Restaurant performance insights
- Business improvement opportunities

The project reflects practical data analysis skills and showcases how Excel can be effectively used for business intelligence and decision-making.

Final Outcome :

An interactive and visually engaging dashboard was created to support data-driven business analysis and reporting.

Thank You

Thank you for reviewing this project.
